# ANNUAL MEETING AND PICNIC

**ANNUAL MEETING**  
**SATURDAY, JULY 10, 2010**  
**10:00 AM**  
**OCEAN PARK SCHOOL**

**ANNUAL PICNIC**  
**1:00 PM**  
**AT THE SURFSIDE BUSINESS OFFICE**  
**REMEMBER TO BRING A DESSERT TO SHARE!**  
**YOU MAY DROP OFF YOUR DESSERT AT THE**  
**COMMUNITY ROOM PRIOR TO THE MEETING**  
**OR BRING IT TO THE PICNIC WITH YOU!**

## ANNUAL FLUSHING TO RESUME

Starting June 14th the water department will resume the annual flushing. If you notice water running in your street try to refrain from using water. If you notice discoloration of your water after the flushing, run your sprinklers for about fifteen minutes.

We apologize for any inconvenience

## SURFSIDE SHERIFF'S PATROL

JUNE 2010

DEPUTY P. JACOBSON

As with prior months June continued to be fairly slow. The crime rates for Surfside continue to be low. I have nothing significant to report. On a personal note it is good to be back after missing most of May. Following are the calls I handled for June.

Agency Assist	8
New House Checks	20
Traffic Complaints	4
Traffic Warnings	8
Traffic Citations	8
Burglaries	1
Theft	3
Trespassing	1
Suspicious Circumstances	10
Citizen Assist	9
Assaults	1
Animal Problems	3
Welfare Checks	1

Court Time - 1 hour

---

## ONLY FEMALE MOSQUITOES BITE!

Washington State has about 45 species of mosquitoes with one thing in common, they all need water to breed and grow. They use moist surfaces and stagnant water to lay their eggs. Besides the many swamps and bogs in our area, their breeding grounds may include standing water found around our homes. These may include old tires, dishes and under potted plants, open buckets, even uncovered boats. Basically anything that may hold water for extended periods make a perfect mosquito breeding ground.

Only female mosquitoes bite, males eat flower nectar and plant juices. Before laying their eggs, mosquitoes seek out a blood meal from a warm-blooded hosts—birds, dogs, deer or **you!** Mosquitoes are drawn to carbon monoxide, heat and moisture in their search for a meal. They use your breath, sweat and skin temperature to track you down. The breath you exhale can attract mosquitoes from up to twenty feet away! Their peak feeding times are at dawn and just past dusk.

### TIPS TO HELP CONTROL MOSQUITOES AND PREVENT BITES

- Empty and get rid of anything that holds or may hold standing water.
- Change water in ponds, birdbaths, fountains and animal dishes at least weekly.
- Make sure your house gutters are clear of blockage and flow freely.
- Fix leaky or faulty outdoor faucets or sprinklers
- Make sure window and door screens are “bug tight” .Repair or replace as needed.
- Stay indoors during peak mosquito activity; at dawn and dusk.
- When going near wetlands or woods, wear long sleeved shirts and long pants. It is also a good idea to wear a hat.
- Use Mosquito repellent when necessary and be sure to follow the directions on the label carefully.
- Adults should apply the repellent to children—kids love to put their fingers n their mouths!
- Use a repellent that has DEET. While others are effective, they do not last as long without this additive. Adults, should use one with at least a 30% blend and with children, no more than a 15% blend.
- Wash all treated skin with soap and water after coming back indoors and launder all clothing before wearing again.

## Western flycatcher

The **Pacific-slope Flycatcher** (*Empidonax difficilis*) is a small [insectivorous](#) bird of the family [Tyrannidae](#). It is native to coastal regions of western [North America](#), including the [Pacific Ocean](#) and the southern [Sea of Cortez](#), as far north as [British Columbia](#) and southern [Alaska](#), but is replaced in the inland regions by the [Cordilleran Flycatcher](#). These two species were formerly considered a single species known as **Western Flycatcher**. In winter, both species migrate south to [Mexico](#), where they are virtually indistinguishable from one another.

In plumage, the Pacific-slope Flycatcher is virtually identical to the Cordilleran Flycatcher, and differs only subtly from most *Empidonax* flycatchers in North America, but its breeding habitat and call are different. In summer, the Pacific-slope Flycatcher inhabits deciduous or mixed woodlands, [hawking](#) for insects from a hidden perch

One of these small insect catchers has built a nest at Martin and Janis Jenkins residence.

---

# Waikiki Beach Concert Series

Cape Disappointment State Park  
Saturday afternoons, 2 pm

These concerts are FREE,  
thanks to our sponsors.

6/12 **Trashcan Joe**

Homemade music with a bit of tradition and a lot of soul

6/26 **Retroactive Gamma Rays**

Vintage-yet modern surf melodies from Lincoln City, Oregon

7/10 **The Blackberry Bushes Stringband**

2nd place winners in the 2009 Telluride Bluegrass Festival band contest in Colorado

7/24 **Double J and the Boys**

Long Beach Peninsula locals make us proud with their old-timey pickin' and grinnin'

8/14 **The Ian McFeron Band**

Acoustic folk to alternative country blues from Seattle, Washington

FMI: (360) 642-3029

## SURFSIDE COMPACTOR

The Day after the Fourth of July was a record breaker for the Surfside compactor area. Nancy was assisted by Tyler and George Miller.

Cars were lined up for blocks! Most people were very friendly and in a good mood, the improved weather must of helped!

July 3, 2010 252 cars visited the compactor. Monday July 5, 2010 there were 479 cars and walkers through the gates at the compactor. This made for a very busy couple of days, and broke any previous records!

**OTHER NEWS**

1. Annual Membership Meeting coming up July 10, 2010—10:00 AM at the Ocean Park School.
2. Annual Membership Picnic following annual meeting July 10th at approximately 1:00 PM at the Surfside Business Office. **Please plan on attending and bring a dessert to share.**

**WATER DEPARTMENT SERVICE REQUESTS  
AND CHARGES.**

Please call ahead when you have work scheduled that will require the Water/Field Services Department to come to your property to shut off water service. You do not need to call them to do a shut off if you know where to turn off the water service.

**The following fees and charges may apply:**

1. Owner request for water shut off (per request) \$ 25.00
2. Upgrade of existing water service \$ 335.00
3. Repair costs of damage to water facilities caused by contractor, owner or others **Time and materials**
4. Water service removal or relocation **Time and materials**

# **ANNUAL MEETING AGENDA**

## Community Event

### 25th Annual SandSations July 14th through the 18th

---

#### Wednesday, July 14

Solo sand artists and the master team building the holiday display sand sculpture will begin building their sculptures. They will be using forms. They call this 'the pound up'.

Don't miss the children's learning play area!

#### Thursday, July 15

**City SandSations Masters Demonstration 8 am - 6 pm**

#### Friday, July 16

Photo opportunities

free sand sculpting lessons

Beach Bonfire 8:00 to ??

#### Saturday, July 17th

Sand Sculpting Contest

Sand Flea Pet Parade

Awards Presentation

## REQUEST FOR DONATIONS FOR STUDENTS AT OCEAN PARK ELEMENTARY

The Community Relations Committee is sponsoring an Outreach Program for the students at Ocean Park Elementary. We are asking Surfsiders to donate new or gently-used clean sweats, socks and/or underclothes for students to change into after playing outdoors on the wet playground. Anything in a size range of Kindergarten through 6<sup>th</sup> Grade will be welcomed! A bin will be available for your donations at the Surfside Office. Thank you for your generosity (the teachers & children thank you, too! ).

Sheila W.
